ASA Philadelphia Chapter Award in Research Excellence (2022-23)

This Award is established to recognize local statisticians who have made outstanding contributions to statistics research. Nominees should be established within their career in the greater Philadelphia area for at least five years. Nominees who have spent longer periods in the greater Philadelphia area (e.g., eight years or more) are preferable. The nominees should have demonstrated national and international recognition in the academic community for exemplary scholarly accomplishments (significance, originality, shaping/furthering the field) in the profession of statistics as evidenced by the body of their work since the terminal degree. This honorary designation is awarded to a maximum of one recipient each year. The awards committee may give favor to nominees with demonstrated contributions to the ASA Philadelphia Chapter and chapter activities.

The recipient will be chosen based upon the following criteria:
- Outstanding research accomplishments in statistics as evaluated by peers and experts in their field
- A substantial positive impact of their research/creative activity in the field of statistics
- Letters of support from colleagues and students

A complete nomination package will include:
- A nomination letter up to four pages addressing the nominee's scholarly accomplishment, and national / international recognition
- The nominee's resume or curriculum vita
- At least two additional supporting letters and at most four additional support letters. Three additional support letters are preferable. Each letter should be no longer than two pages.

The nominator should email the complete nomination package to the ASA Philadelphia Chapter at amstatphiladelphia@gmail.com no later than 11:59 pm, January 16, 2023. Please indicate in the email subject line "ASA Philadelphia Chapter Award in Research Excellence Nomination".

Previous Awardees:
Mingyao Li (2021-22), Hongzhe Li (2019-20)
