

Second Annual Workshop: Emerging Data Science Methods for Complex Biomedical and Cyber Data

A Workshop Hosted By:
Department of Population Health Sciences at Medical College of Georgia
and School of Computer and Cyber Sciences
Augusta University

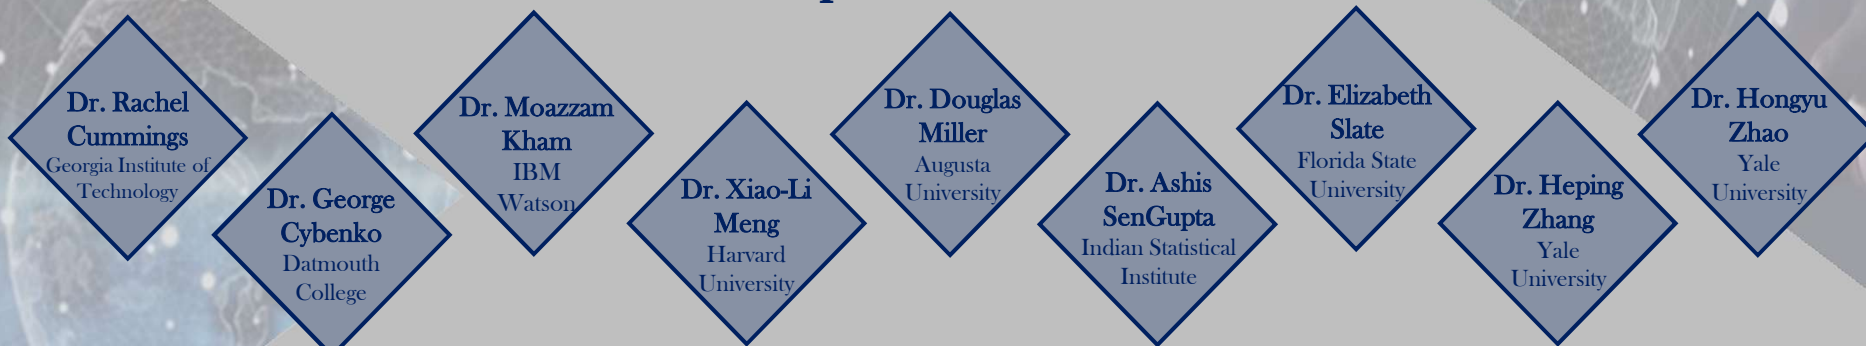

March 26 - 27, 2020

For more information and registration:
www.augusta.edu/mcg/dphs/workshop2

We have witnessed the explosion of complex and big data in the recent decade from genomics, social media, cyber traffic, and other environments surrounding us. This workshop, funded by the National Science Foundation (NSF), is aimed at empowering researchers with emerging data science tools to handle such data.

Attendees of the workshop are encouraged to present posters or give five minute presentations on their original research. A limited number of NSF funded travel awards are available to attendees.
